

**The most flexible solution on the market providing you precision and effectiveness in the agri-food transformation world.**

This traceability management software was specially designed for transformation corporations in the food processing industry. *mi-Trace™* allows these companies to effectively manage the new quality standards of their industry.

Once installation is complete, *mi-Trace™* is integrated to the production line, being thus connected to scales and label printers. Production managers are then able to obtain and print the weights as well as the necessary information for the traceability of the goods, besides being able to supply detailed reports required by the customers.

**Business Driver:**

- Laborious production management
- High labor cost
- Traceability deficiency
- HACCP norms
- Out of stock
- Unsatisfied customers
- Redundancy of data entry
- Mistakes in orders
- Laborious report
- Manual lots management
- Expiry date management
- Non integrated billing
- Recall management
- New production setups

**Proposed solutions by *mi-Trace™*:**

**Flexibility**

- Support both fully automated and semi-automated processes
- Multilingual user interface
- Modular solution, adapting to your specific needs
- Easily integrates with existing business systems

**Efficiency**

- Optimized strating up and packaging operation
- Continious traceability
- Integration of scales and printers to the network
- Simultaneous labeling and packaging

**Precision**

- RF and barcode capability
- Inventory and transformation management
- Quality control in receiving and shipping
- Inventory control by expiry dates

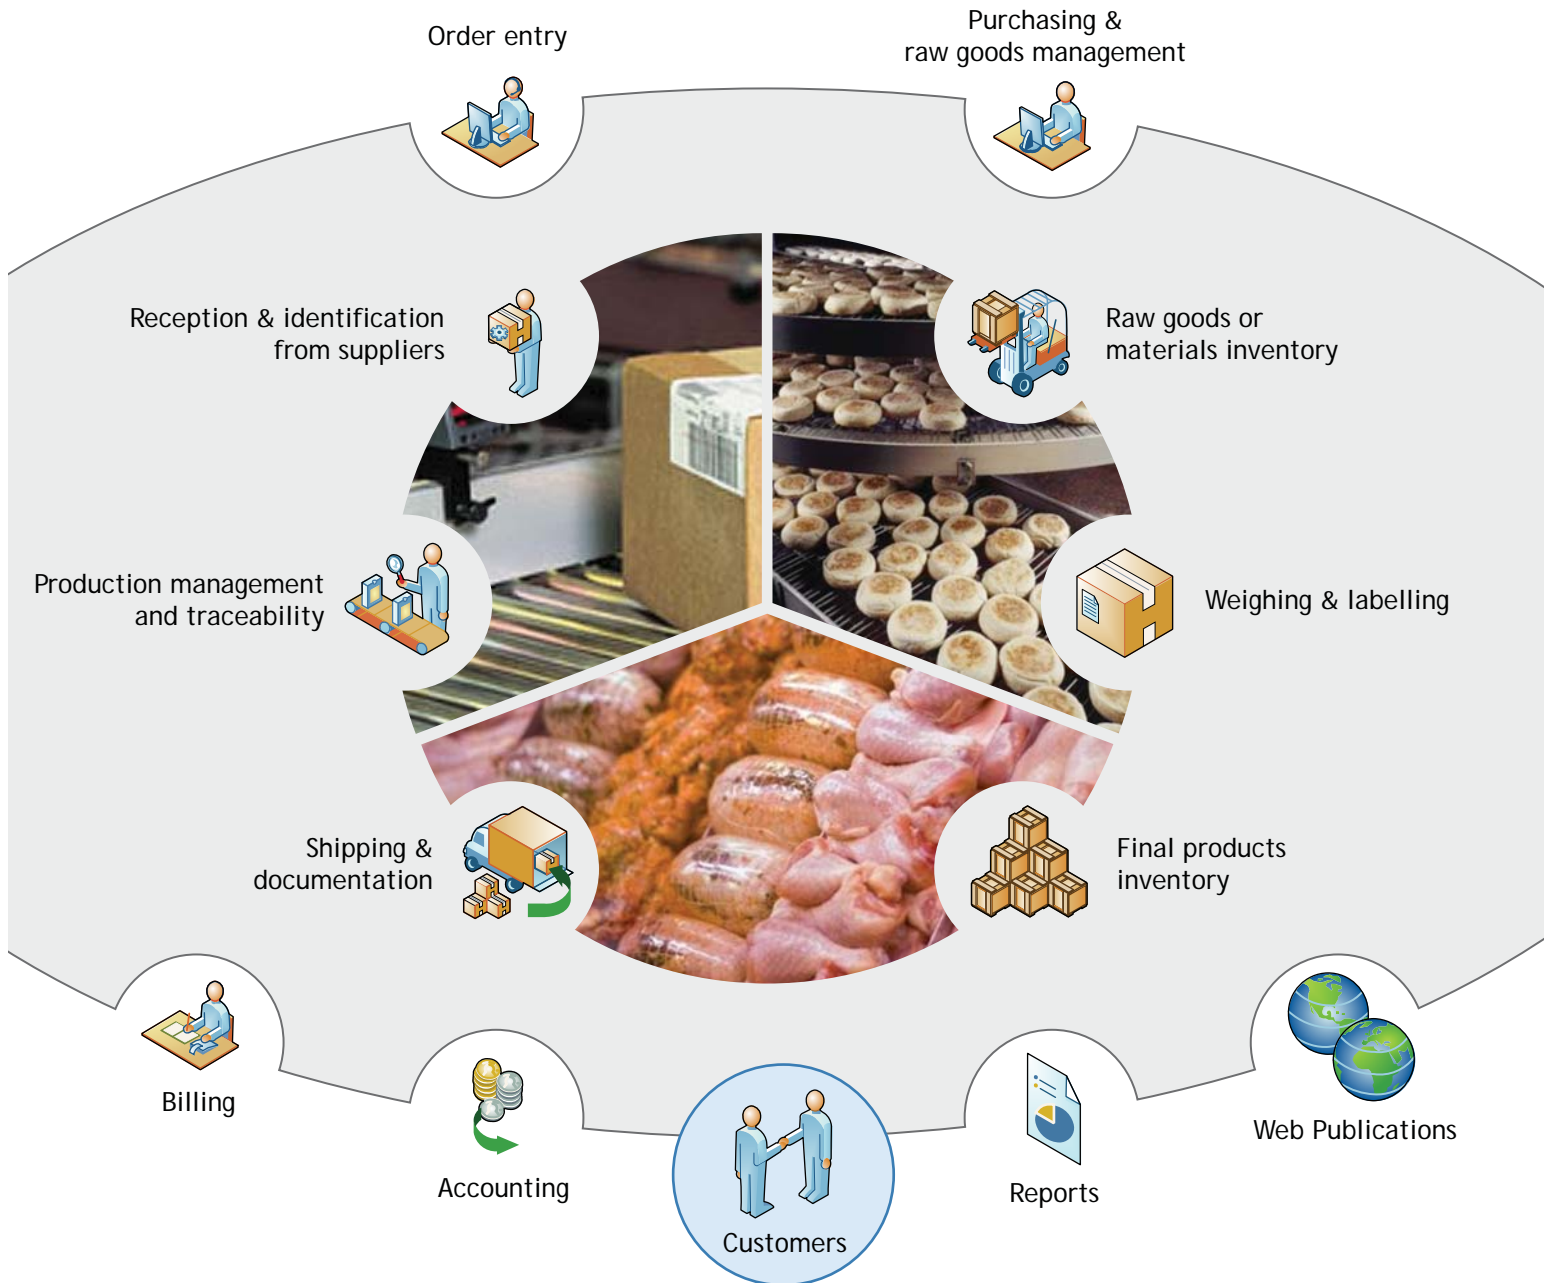

**Project Survey**
